

## Urolift comes to North Hampshire Hospital

On Thursday 21 January, Richard Hindley performed the first Urolift Case at [the North Hampshire Hospital](#) in Basingstoke.

Following on from the successes that Urology Partner Neil Barber has seen performing [Urolift](#) at [Frimley Park NHS Trust](#) and [Spire Clare Park Hospital](#), Richard Hindley was keen to bring this life changing procedure to Hampshire. Until the end of last year, for men suffering from Benign Prostatic Hyperplasia (BPH) the Urolift Procedure was only available privately. It has now been approved by NICE to be offered under the NHS which is wonderful news for men whom medication has not been successful for.
